## 1. General Information

The purpose of a *CETECOM* GSM Assessment Report, which is issued by *CETECOM*'s accredited GSM test laboratory, is to provide a summary statement of conformity for the Equipment under Investigation (EUI) towards all applicable technical requirements as given within the relevant GSM standards.

Another purpose of a *CETECOM* GSM Assessment Report is to take into consideration the applicability of (re)testing in all cases where the EUI or variants thereof have already been tested before, in cases of product updates or upgrades or when accessories with relevance to conformity requirements shall be introduced.

*CETECOM* GSM Assessment Reports may only be issued for those EUI, modifications thereof, derivatives thereof or accessories, where sufficient technical documentation has been made available to *CETECOM* to allow an overall judgement by taking into consideration all relevant information.

## 2. Summary of the Assessment

*CETECOM* has received and verified the client's and/or manufacturer's documentation for the Equipment under Investigation (EUI) and came to the conclusion that - according to this documentation - the EUI

**Software Version:** Open AT® Firmware 6.57c

### 4.2. Front View of the Equipment under Investigation

## 5. Applied Reference Document(s)

The following reference document(s) built the basis for the *CETECOM* assessment of the Equipment under Investigation:

No.	Document Identity	Document Title/Version	Version/Date
[1]	GCF-CC	Global Certification Forum - Certification Criteria	V3.25.0 (2007-01)

## 6. Assessment for the Equipment under Investigation (EUI)

### 6.1. Assessment for Software Update(s)

The software of the WAVECOM SA GSM 850/900/1800/1900 Wireless CPU type New Q24series was updated

from version Open AT® Firmware 6.57b (initial version)  
to version Open AT® Firmware 6.57c (final version).

The software update documentation received from the client and/or manufacturer (see documentation: Q24NG\_certification background\_OS6.57c\_v1) states that the implemented software update modifications have impact on the EUI's conformity towards all the applicable technical GSM requirements. *CETECOM* checked the documentation and came to the conclusion that conformity of the EUI with the above mentioned final software version can be presumed with partial additional retesting.

All recommended tests have been performed at *CETECOM*'s (own and/or subcontracted) accredited GSM test laboratories.

Detailed results are given in the related *CETECOM* GSM Test Report No. 504/07T03.

*CETECOM* came to the conclusion that conformity of the EUI with the above mentioned final software version can be presumed because the testing did not reveal any errors.

The EUI's overall conformity towards GCF-CC V3.24.1 is based on the previous conformity of the initial SW version Open AT® firmware 6.57b as stated in *CETECOM*'s assessment report: 1-504\_07A04.

To ensure the EUI's overall conformity towards GCF-CC V3.25.0 based on the previous conformity to GCF-CC V3.24.1 (see documentation: assessment report: 1-504\_07A04), *CETECOM* did not recommend additional testing to ensure the conformity to all applicable technical GSM requirements.
